Carson City, Nevada

Randy Bowling is a skilled civil engineer with extensive experience in both the private and public sectors. Randy started his career with the Nevada Department of Transportation engineer in construction and environmental studies. After ten years, Randy entered private practice, bringing transportation planning, design, and construction experience and knowledge to private and public clients. With his diverse experience gained from a variety of projects and clients, Randy has developed a skill set that identifies complex issues to resolve competing project goals.

## EXPERIENCE **Nevada LTAP Center**, Reno, Nevada, 2014 – Present
